## SUMMARY

I'm a highly motivated individual with a strong interest in all things tech. Throughout my journey, I've developed a variety of applications with a solid focus on responsive design and API integration. I have experience in both front-end and back-end development, giving my coding abilities a wide range of flexibility. I thrive on tackling challenges and am committed to continuously improving my skills.

## TECH EXPERIENCE

### HTML & CSS

July 2023 - September 2023

- Learned the fundamentals of HTML & CSS. With this knowledge I took part in an application process for Code Your Future, which entailed building a basic portfolio webpage
- Created responsive web pages with a 1 week deadline for each project based on wireframes
- Practiced implementing my Graphic design knowledge into live webpages

### JavaScript

September 2023 - December 2023

- Learned how to break problems down into sub-problems by completing weekly Codewars
- Built interactive user interfaces using DOM manipulation
- Used asynchronous programming to handle events and data

### React JS

January 2024 - February 2024

- Explored frameworks, libraries, and declarative programming
- Developed unit tests with Jest
- Built a dynamic web application in an Agile team

### NodeJS

February 2024 - March 2024

- Learned how to write server-side JavaScript with Node.JS
- Developed CRUD applications with Express.JS \& React
- Wrote and tested APIs using Postman

### PostgreSQL

March 2024 - April 2024

- Learned about structured data storage and retrieval
- Created relational databases, how to query those databases sketching and designed databases

## OTHER EXPERIENCE

### Earthing Assistant (ECS Solutions)

London - May 2020 - April 2021

- Ensured all risk-assessments were carried out before completing tasks, leading to a 100% completion of jobs without any injuries, compared to 95% in the previous year
- Assessed any potential risks and reported back to the nominated person (supervisor)
- Collaborated with an authorized person to isolate overhead lines, which ensured the safety of railway workers on-track

### Railway Civil Engineer (Stone Alliance Services)

West Midlands - March 2018 - February 2020

- Participated in a team of 6 to complete the stressing and de-stressing of rail lines
- Quickly adapted to learning new machinery such as a Chembre, which led to a 20% increase of speed in completing tasks
- Liaised with supervisors to ensure tasks were completed to the companies standards

### Railway Engineer (Carillion PLC)

UK - January 2017 - January 2018

- Collaborated with my team members to work additional hours during the holiday season, ensuring timely completion of our project prior to the new year. This collective effort resulted in all project milestones were met
- Gained extensive experience in a variety of groundwork tasks, such as: trial holes, buried ducting & electrical cable management
- Achieved a 100% success rate in all tasks and received outstanding feedback from management

## ACHIEVEMENTS

### Completed a Full Stack bootcamp

Successfully completed an intense 1 year Full Stack developer bootcamp, which has been a pivotal and life-changing achievement

### Passionate mentor within my bootcamp

Throughout Code Your Future I've demonstrated a passion for mentorship, by consistently going above and beyond to support my classmates in their coding journey, leading to a collaborative learning environment

### Being a good dad!

Although it's not career relevant, my kids are my biggest achievement! They constantly inspire and fuel my drive for success both personally and professionally

## INTERESTS

Mixed Martial Arts | Reading Manga | Watching Anime | Family Time
